J E F F E R S O N   L I M

S K I L L S

Skills: Javascript, ES6, Angular, Typescript, Vanilla Javascript, HTML5, CSS, SCSS, Observables, RxJs, Reactive Programming, Forms, Validation, Bootstrap, jQuery, Node.js/Express, RESTful API, Git, Github, JSON, Highcharts, Data visualization, MongoDB, Responsive Web Design, Amazon S3, Kentico, Jamstack, Jira, Agile, React.js, Redux

E X P E R I E N C E

Freelance   May 2023 - Current
Web development
- Collaborated with cross functional teams on various projects and developed web apps for clients utilizing different technologies including Javascript, Typescript, modern JS frameworks, Bootstrap, Node.js, and AWS

loanDepot | Software Engineer   Feb 2022 - Aug 2022
Software web development - Angular, NX, Typescript, NGRX, Jamstack, Bootstrap, C#, Azure pipelines
- Executed web requirements through the CI/CD pipeline for production success for 2 million monthly online visitors, contributing to the brainstorming and development of these features.
- Improved and solved UI issues throughout loanDepot's catalog of web apps by implementing component logic and responsive design, including Bootstrap, Material, custom utility classes.
- Created Angular directives and C# features for Kentico CMS users based on cookie and local storage data, automating manual work into functional features.
- Decoupled and refactored styles, custom components, and state code into NPM libraries for DRY (Don't Repeat Yourself) development.
- Fulfilled HELOC UI launch requirements in a tight schedule working with designers and team leads.

SevenLogics | Front-End Engineer   2018 - 2022
Front-end web development - Angular, Typescript,, Bootstrap, Node.js , MongoDB
- Key developer in building the front-end Angular web app for the production launch, resulting in thousands of members for its health care platform.
- Created complex SaaS dashboards, data visualization tools, and work queue UI modules from design mockups for both customer and business use.
- Developed the UI for shipment workflows and product scans for thousands of orders, increasing efficiency and volume.
- Utilized Observables and RxJS for component architecture and state management with one-way data flow.
- Collaborated with backend engineers to consume RESTful APIs with Node.js

A P P L I C A T I O N S

- **Gojji** - Healthcare web app showcasing dashboards, work queues, and data visualization for workflow mgmt
- **Specialty** - Pharmacy driven dashboard for medical flows regarding patient health and medication history
- **Bloom** - Plant monitoring app keeping track of multiple plant's water moisture, temperature, and light levels
- **Tee Time Getter** - Chrome ext. to obtain golf tee times utilizing extension documentation - Vanilla JS.
- **Task Postings** - Pilot web app for side gig posts for posters and workers - Angular, Material, MongoDB
- **Mood board creator** - Generate users and mood board albums for photos - React.js, Redux, Tailwind
- **Gift Tracker** - Users can add and search gifts. WIll show total amount - React.js, Redux, Bulma
